

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1 **Claim 1 (previously presented):** A portable cellular
2 phone comprising:
3 a music data retrieving means which retrieves music
4 data;
5 and
6 a downloading means which downloads an application
7 software corresponding to a music data format defined in
8 connection with the music data from a remote server.

1 **Claim 2 (original):** The portable cellular phone
2 according to claim 1, wherein the retrieving means
3 retrieves the music data from a storage medium.

1 **Claim 3 (original):** The portable cellular phone
2 according to claim 1, wherein the retrieving means
3 retrieves the music data via a communication means.

1 **Claim 4 (original):** The portable cellular phone
2 according to claim 1, further comprising an application
3 software executing means which executes the application

4 software in association with the music data in the cellular
5 phone.

1 **Claim 5 (original):** The portable cellular phone
2 according to claim 4, wherein the application software
3 executing means executes a plurality of pieces of
4 application software in parallel simultaneously in
5 association with the music data.

1 **Claim 6 (previously presented):** A method of operating
2 a portable cellular phone comprising the steps of:
3 the cellular phone retrieving music data;
4 a user selecting an application software corresponding
5 to a music data format defined in connection with the music
6 data; and
7 downloading the application software from a remote
8 server to the cellular phone.

1 **Claim 7 (previously presented):** The portable cellular
2 phone according to claim 1, wherein the downloading means
3 downloads the application software via a wireless
4 communicating means.

1 **Claim 8 (previously presented):** A portable cellular
2 phone comprising:

3 a music data retrieving means which retrieves music
4 data;

5 a downloading means which downloads an application
6 software corresponding to a music data format defined in
7 connection with the music data from a remote server; and

8 an application software executing means which executes
9 the application software in association with the music data
10 in the cellular phone;

11 wherein the application software executing means
12 executes a plurality of pieces of application software in
13 parallel simultaneously in association with the music data.

1 **Claim 9 (previously presented):** The portable cellular
2 phone according to Claim 8, wherein the retrieving means
3 retrieves the music data from a storage medium.

1 **Claim 10 (previously presented):** The portable
2 cellular phone according to Claim 8, wherein the retrieving
3 means retrieves the music data via a communication means.

1 **Claim 11 (new):** A portable terminal, comprising:
2 a storage portion configured to store a reproducing
3 application and content data;
4 an identifying portion that identifies the content
5 data stored in the storage portion;

6 a searching portion that searches the reproducing
7 application that enables to reproduce the identified
8 content data in the storage portion;

9 an instructing portion that instructs a server to
10 transmit reproducing information about the reproducing
11 application to the portable terminal through the
12 communication network when the reproducing application that
13 enables to reproduce the identified content data is not
14 stored in the storage portion; and

15 a receiving portion that receives the reproducing
16 information.

1 **Claim 12 (new):** The portable terminal as set forth in
2 claim 11, wherein the reproducing information includes the
3 reproducing application that enables to reproduce the
4 identified content data.

1 **Claim 13 (new):** The portable terminal as set forth in
2 claim 11, wherein the reproducing information includes a
3 list of the reproducing application that enables to
4 reproduce the identified content data and is transferable
5 from the server to the portable terminal through the
6 communication network.

1 **Claim 14 (new):** The portable terminal as set forth in
2 claim 13, further comprising:
3 a selecting portion that selects the reproducing
4 application from the list; and
5 a requesting portion that requests the server to
6 transmit the selected reproducing application to the
7 portable terminal through the communication network; and
8 wherein the receiving portion receives the selected
9 reproducing application.

1 **Claim 15 (new):** The portable terminal as set forth in
2 claim 11, wherein the storage portion is detachable from
3 the portable terminal.

1 **Claim 16 (new):** The portable terminal as set forth in
2 claim 11, wherein the receiving portion receives the
3 content data through the network.

1 **Claim 17 (new):** The portable terminal as set forth in
2 claim 11, wherein the identifying portion identifies a
3 format of the content data; and
4 wherein the searching portion searches the reproducing
5 application that enables to reproduce the content data
6 having the identified format.

1 **Claim 18 (new):** The portable terminal as set forth in
2 claim 11, wherein the content data is music data.

1 **Claim 19 (new):** The portable terminal as set forth in
2 claim 17, wherein the format of the content data is at
3 least one of MP3, MPEG and Quick-Time.

1 **Claim 20 (new):** The portable terminal as set forth in
2 claim 11, further comprising a recording portion that
3 records a history of the transmission in which the
4 reproducing application was downloaded and stored in the
5 storage portion.
